SUMMARY

Computer Science Engineering undergraduate who independently designed, built, and deployed a full-stack web platform now used by 11,000+ people across two institutions. Comfortable owning a project end-to-end - from architecture to shipping - with a strong foundation in full-stack development and a growing focus on applied AI. Seeking a Software Engineering / Full-Stack Developer internship

PROJECTS

RUTE - Revival of Urban Tree Ecosystem

Solo Project

- Architected and independently built a full-stack web platform that digitizes urban trees using QR-based identification, from requirements through deployment
- Engineered dynamic search, live location display, an FAQ system, and bilingual content delivery (Tamil, Hindi) to maximize accessibility for local users
- Digitized 50+ trees and deployed the platform at two educational institutions, driving 11,000+ visitor engagements - a real-world, production-scale outcome delivered solo

HealCare AI - AI-Powered Smart Hospital Management Platform

In Progress

- Designing a role-based hospital management system with four dedicated dashboards (Admin, Doctor, Receptionist, Patient) modeling real hospital workflows
- Built responsive, production-grade UI modules for patient/doctor management, appointment scheduling, medical records, billing, and analytics using React, TypeScript, and Tailwind CSS
- Currently extending the platform with backend services and AI-assisted features for scheduling and diagnosis support
